Scenario 1: Realtime Synchronization of User Lists
1 navigateToMyListsTab()
2 attachMovieListsListener(userId, callback)
3 collection("users").document(userId).collection("lists").addSnapshotListener()
4 onEvent(snapshots, error)
loop
[each DocumentSnapshot]
5 new MovieList(id, name, createdAt)
6 movieList
7 onSuccess(movieLists)
8 setMovieLists(movieLists)
9 notifyDataSetChanged()
10 displayMovieLists(count, cards)
Scenario 2: Create New Movie List
11 clickAddListButton()
12 showCreateListDialog()
13 enterListName("Sci-Fi Classics") & clickCreate()
14 new MovieList(UUID.randomUUID(), "Sci-Fi Classics")
15 newList
16 createMovieList(userId, newList, callback)
17 collection("users").document(userId).collection("lists").document(id).set(data)
18 onSuccess()
19 onSuccess(null)
Realtime Snapshot Listener automatically
triggers onEvent() to update UI smoothly
20 showToast(R.string.list_created_success)
